

Testing Your Security System

1. Call the Central Station at 513-921-4300 and ask them to place your security system on test. (You will have to verify your account by providing them with your password or account number)
2. Arm the security system.
3. Set off the alarm by either walking past a motion detector or opening a door or window that is protected with a sensor.
4. Let the siren go off for 15 seconds then disarm like normal.
5. Call the Central Station back at 513-921-4300 to make sure they received the signals.
6. If your security system has successfully tested, ask the Central Station take your Security System off the test mode.
7. If the security system did not successfully test, repeat the process once again or call Dial One Security to schedule a service call at 513-527-4400.
